# Working with StepNotate

*A quick tour of the marks you can make on this page.*

Select the highlight tool and drag across any sentence below. The mark snaps to the text, not to your cursor, so it stays honest when you zoom. Underline and strikethrough live in the same place: select text first, then pick the mark from the floating bar.

## Try these next

### Pen and marker

Draw freehand with the pen, or lay down translucent colour with the marker. Hold Shift for a straight line.

### Shapes

Press R for a rectangle, then drag. Shift constrains it to a square. Arrows and lines sit in the same flyout.

### Notes and text

Drop a sticky note with N, or click with T to type a box straight onto the page.

### Signature

Press G, draw once, and your signature is kept for every document after this one.

**Everything here runs locally.**

Files never leave this browser. Marks are stored in local storage, exports are written on your machine, and there is nothing to sign up for.

## Colour notes

- Sun — the default highlight
- Mint — a cooler pass
- Sky — for references
- Vermilion — the brand mark

# Marking this page

This last page is deliberately plain. Use it as scratch space: scribble with the pen, stamp a signature, drop a note in the margin, or highlight whichever line you disagree with. Nothing here is precious.

## A short checklist

- [ ] Highlight this sentence to test text marks.
- [ ] Draw a circle around the word checklist.
- [ ] Write a note in the margin with N.
- [ ] Sign your name at the bottom.
- [ ] Export the result with Ctrl S.
